White BOPET Overview

The Art
Of Packaging

Introduction:

Petco introduces high quality Polyester Films for a wide variety of packaging applications.

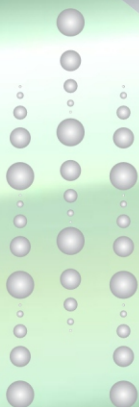

White Films Category

White Twist Films

White and White-Metallized Lamination Films

White Lid Films

The Innovative High Quality
Films For Packaging
Applications.

1 White Twist Films

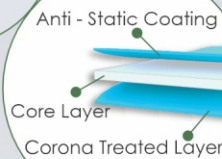

White opaque BOPET candy wrap

- Excellent opacity & white appearance
- Outstanding twist retention
- Excellent antistatic properties and machinability for high speed packaging
- Suitable for single & double candy wrap

Petwist 432S

More than
70% Opacity
80% Gloss

Petwist 432Y

White BOPET Overview

2 White & White-Metallized Lamination Films

White opaque BOPET films for printing, metallizing and lamination

a White Films

- Excellent whiteness and opacity
- Good thermal stability
- Cost-saving converting process due to its natural white color

b White-Metallized Film

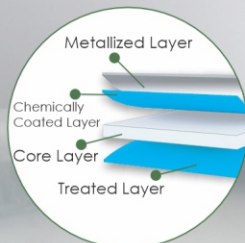

White opaque metallized BOPET films for 2 ply flexible packaging and cardboard Lamination.

- Excellent whiteness
- Excellent light and oxygen barrier
- Cost-saving where white backing is required

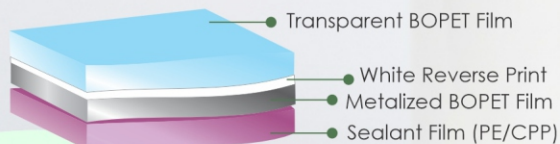

In white metallized chemically coated film, (Petmet 131HB) the target is to replace triplex with duplex structures.

Petpak 131S

Petpak 332S

White BOPET Overview

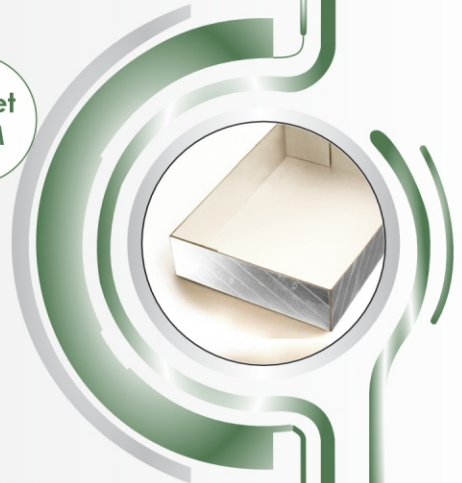

Petmet 131HB

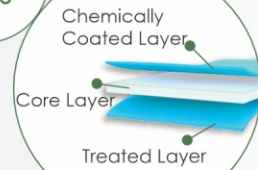

For cardboard lamination:

This film is mainly used for laminated cardboard structures, where the metallized side of the film is laminated to cardboard with special adhesives and white side of film provides brilliant glossy white appearance.

3

White Lid Films

White opaque isotropic BOPET film specially designed for lid applications

- Excellent whiteness and opacity
- Cost reduction as no white base color is necessary
- Good adhesion to heat seal coating and printing inks
- Superior isotropic value
- Safe use without risk of injury by sharp edges

Superior Isotropic Value

Tensile Strength Ratio
(+45° / - 45°) ≤ 1.5

Main Applications:

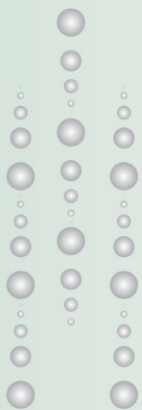

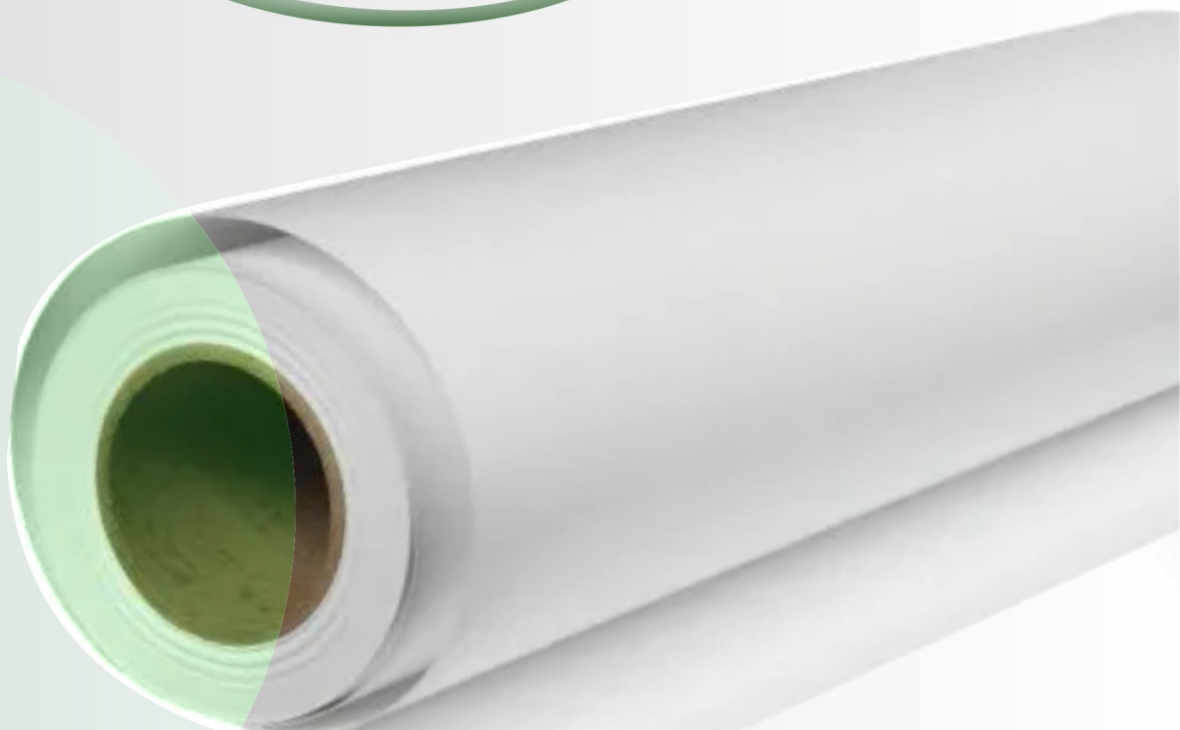

- Yoghurts
- Dessert
- Mineral water
- Instant soup

BOPET White Films Overview

Product	Description	Thicknesses
Petwist 432S	Anti-static coated white foldable film	18 - 23
Petwist 432Y	Anti-static coated high opaque white foldable film	18 - 23
Petpak 332S	Special chemically coated white film	12 - 23 - 36
Petpak 131S	Corona treated white film	12 - 23 - 36
Petmet 131HB	White-metallized chemically coated film	12 - 23 - 36
Petmet 130M	White metallized film	12 - 23 - 36
Petlid 332S	Isotropic chemically coated white film	12 - 36 - 50
